FISH FEED BY SKRETETING - YOUR ASSURANCE OF QUALITY

Skretting, part of the Nutreco Group, is the leading producer of feed to farmed fish. We take great pride in creating products that allow our customers to produce the healthiest and best quality fish. Fish feed from Skretting in Norway meets the highest international standards and is produced in accordance with:

- Norwegian food legislation of 19 December 2003, number 124 and Norwegian Ministry of Fisheries and Agriculture legislation of November 7 2002.
- Regulation (EU)No 277/2012 amending Directive 2002/32/EC on undesirable substances in animal feed as regards dioxin and dioxin-like PCBs with a maximum limit of 1.75 ng WHO-PCDD/PCDF-TEQ/kg (dioxin)/5.5 ng WHOPCDD/PCDF-PCB-TEQ/kg (sum dioxin and dioxin-like).
- Analysis programme for Aflatoxins (mycotoxin).
- Norwegian legislation of 6 April 2004, number 595 prohibiting the use of processed animal proteins, including mammalian and avian proteins, with a derogation for certain products under specific conditions, such as fishmeal used in fish feed and gelatine of non-ruminant origin used as coating of some vitamins.
- Raw materials used in Skretting's fish feed satisfy Norwegian GMO legislation (Norwegian Ministry of Fisheries and Agriculture legislation with changes of September 15, 2005). The Norwegian legislation is harmonized with EU legislation (regulation (EC) no 1829/2003 and 1830/2003).
- ISO 9001, ISO 14001 and ISO 22000 standards, for which Skretting is certified. Our internal hygiene quality control standards are based on HACCP. Skretting is GLOBALGAP certified. GLOBALGAP number is 4050373469207
- When purchasing feed from Skretting you are guaranteed that your stock is being fed only the highest quality ingredients. Our feed consists of the following ingredients:

Soya protein
Sunflower meal
Faba beans
Wheat
Vitamin and minerals

* No use of fishmeal or by-products produced from farmed fish. Some of our feeds for marine species consist of only marine raw materials.

- Raw material from renewable and sustainable resources. Skretting applies a purchasing policy that focuses on fishmeal and fish oil to be sourced from managed and sustainable fisheries. All suppliers must be able to document that the fish used to produce fishmeal and fish oil have been responsibly sourced without depleting fish stocks or damaging the wider marine environment.
- Electronic traceability system, recall procedures and food safety documentation on raw materials and feeds.

Skretting combines the latest technology and science with the dedication of our staff to produce the highest quality feed. We do our utmost to secure that our business operates in as environmentally sensitive a manner as possible. We invite you to visit us and audit our quality systems to assure yourself that you are buying the best quality feed from the leading fish feed producer.

Sincerely,

Anita Viga
